Broadband Stimulus Gone Wild... Applicants Revealed + Industry Checks

Investment Summary

We continue to expect vendors such as Adtran, ADC, and Occam will benefit from the Broadband Stimulus program. We suspect, however, that it could take longer-than-expected for the funds to begin helping vendors.

Event

Yesterday, the government organizations overseeing the broadband stimulus program posted a detailed listing/description of the 2,200 individual funding proposals submitted into the program. Also, we've been checking in with industry contacts for additional details on the pace and procedures around the Broadband Stimulus program. Our findings are detailed below.

Key Points

- **BROADBAND STIMULUS APPLICANTS REVEALED...** Yesterday, the government organizations overseeing the broadband stimulus program (RUS and NTIA) posted a detailed listing/description of the 2,200 individual funding proposals submitted into the program. The proposals total \$28 billion – four times the \$7.2 billion expected to be spent on the entire program (summary statistics were released previously).
- **MORE BROADBAND WIRELESS AND "MIDDLE MILE" APPLICATIONS THAN EXPECTED...** In parsing the data, we found that there are 737 individual Broadband Wireless proposals totaling \$8.9 billion. There were 368 separate project proposals classified as Middle Mile applications (i.e. Optical Transport) for \$9 billion in total dollar value. Both areas received more applications than we would have anticipated.
- **LAST MILE WIRELINE...** We count 393 individual broadband proposals totaling \$5.4 billion dollars -- the bulk of which are focused on rural markets. Based on our conversations with consulting engineering firms, we presume a large percentage of these last mile wireline deals are FTTP projects.
- **OUR INDUSTRY CONTACTS BELIEVE THE PROCESS WILL SHIFT OUT...** Our contacts are generally skeptical about the timing of Round 1 project decision-making and disbursement timetables. This shouldn't be a major surprise as the program has already had push-outs on timing.
- **VENDORS: INCREMENTAL POSITIVE FOR INFINERA... INCREMENTAL NEGATIVE FOR ADTRAN AND ADC...** The size the "Middle Mile" project category was bigger than we expected. Also, a significant number of Infinera's customers have sizable requests for funding. Previously, we hadn't thought of Infinera as a Broadband Stimulus beneficiary. Our update is incrementally negative for ADC, Adtran, and Occam. Investors have fully viewed these companies as Stimulus beneficiaries for some time. Any further delays in the project would be perceived as incrementally negative for these vendors.

DETAILS:

BROADBAND STIMULUS APPLICANTS REVEALED... Yesterday, the government organizations overseeing the broadband stimulus program (RUS and NTIA) posted a detailed listing/description of the 2,200 individual funding proposals submitted into the program. We have provided a schedule of applicants in the PDF version of this report. The proposals, of course, total \$28 billion – four times the \$7.2 billion expected to be spent on the entire program (summary statistics for the applications were released previously). Including the equity dollars committed by service providers and other respondents, total proposed spending equals \$38 billion. Our takeaways from the release of data on the proposals and recent checks with industry contacts regarding the Stimulus program...

LOTS MORE BROADBAND WIRELESS APPLICATIONS THAN WE EXPECTED... In parsing the data, we found that there are 737 individual Broadband Wireless projects totaling \$8.9 billion in proposals. This is more than we would have expected. Project funding requests range from \$530 million for EchoBlue (a satellite joint venture between EchoStar and WildBlue) to BeamSpeed, an outfit looking for \$2,014 for a Motorola WiMax radio in Yuma, AZ. A number of the larger wireless projects are satellite-based, although there is a large number of WiMax / 700 MHz deals in the applications. Clearwire – which Ciena is shipping into – is requesting \$40 million for projects in Detroit and Puerto Rico. Other projects call for CDMA EVDO deployments in selected areas. Some of the projects don't specify which wireless technology their using (initial descriptions were very brief). Others are using hybrid approaches with both Broadband Wireless and FTTx.

Within our research universe, vendors poised to potentially benefit from Broadband Wireless deployments include CommScope (CTV, Buy, \$29.26), Alcatel-Lucent (ALU, €2.63, Underperform), and Ciena (CIEN, Hold, \$15.67) via their Clearwire relationship.

LOTS OF MIDDLE MILE PROJECT APPLICATIONS... MORE THAN WE EXPECTED... There were 368 separate project proposals classified as Middle Mile applications. In aggregate, they total \$9 billion in dollar value. This is significantly more than we would have anticipated. Projects range from a \$345 million, submarine cable project around Western Alaska to an \$800 broadband project in Shafter, CA. Scanning the brief project descriptions, we note that virtually all of these projects include fiber cabling and optical transport equipment.

Within our research universe, we believe this proposal list is particularly encouraging for Infinera (long haul WDM equipment), and ADC Telecom (fiber connectivity gear). Ciena seems like an obvious play on optical transport gear however the company has commented that they don't have many customers bidding for Stimulus money. We note that Infinera's customers include a number of tier 2 bandwidth wholesalers that have submitted sizable proposals. These include: Zayo Bandwidth (\$25 million), DeltaCom (\$9 million), South Dakota Network (\$20 million), Mid-Atlantic Broadband Co-op (\$16 million), 360 Networks (\$15 million), CityNet (\$34 million), and Level 3 (\$19 million, although the operator is moving away from Infinera). Obviously, a significant portion of these projects would include labor and fiber cabling costs – not just optical transport gear. Nonetheless, we assume these projects can be an incremental contributor for Infinera next year. One caveat...it's quite possible that the RUS / NTIA project acceptance rate on "Middle Mile" projects might be lower than other project classifications – it's not as directly connected to providing rural areas with broadband access as projects classified as "Last Mile" projects.

LAST MILE WIRELINE... Turning to projects classified as "Last Mile," we count 393 individual broadband project proposals totaling \$5.4 billion dollars. Note that these are wireline projects -- we've parsed Wireless Broadband "Last Mile" projects out of the "Last Mile" category. As with the other categories, project funding requests vary greatly by carrier. On the top end, Edgenics Inc. (provides "learning services" in rural areas) requested a staggering \$402 million. The second largest request (\$145 million) comes from UJet Holdings which is looking to offer broadband services within Puerto Rico. As expected, the majority of project proposals focus on offering broadband services to rural markets, with target customers including residential households, small businesses, churches, and hospitals. Based on our conversations with consulting engineering firms, we presume a large percentage of these last mile wireline deals are FTTP projects.

Within our research universe, vendors positioned to benefit from these projects include ADC Telecom, Occam Networks, (OCNW, Hold, \$3.83) and Adtran (ADTN, Hold, \$23.90). We note that ADC generates a "mid-single digit" percentage of revenues from independent telco accounts (annual sales of roughly \$50 - \$75 million). They've stated that the company could potentially claim \$100-150 million of \$400-500 million market opportunity associated with the Stimulus Plan in the 2010 / 2011 time frame. For Adtran, we estimate that IOCs account for 10-20% of Adtran's quarterly revenues. Given Tellabs' (TLAB, \$6.95, Hold) struggles in IOC space, we assume the company wouldn't capture much benefit from the Stimulus program. Alcatel-Lucent, similarly, has not traditionally had much success in the IOC space.

BACKGROUND ON THE STIMULUS PROCESS... There are two entities overseeing the Broadband Stimulus program: 1) Department of Agriculture's Rural Utilities Service (RUS); and 2) the Department of Commerce's National Telecommunications Information Administration (NTIA). The RUS organization will be releasing \$2.5 billion in Stimulus funds in the form of grants, loans, and loan guarantees. The NTIA will be releasing \$4.7 billion in total funding. Each of the organizations have similar criteria for selecting projects (underserved areas, minimum definitions for broadband, projects that are "shovel ready", projects that operators would not have taken on with their own capex dollars, etc). Also, we note that the RUS and NTIA organizations have coordinated their efforts here – entities can submit proposals to either organization or to both organizations. Timetables are expected to be the same for both sources of stimulus dollars.

There will be three rounds of funding in total. Under current expectations, the first round of decisions is expected to be made in November. In Round 1, RUS expects to award \$2.4 billion while NTIA expects to award \$1.6 billion. The formal project submissions for the first round were due back on several weeks ago. As stated above, RUS and NTIA just posted a detailed listing of the 2,200 individual funding proposals submitted into the program. Each project has a brief description although we hear that the RUS/NTIA will release the executive summaries of each proposal shortly. Also, we've been told that they expect to announce the finalists for Round 1 project submissions sometime next week. Final Round 1 project awards are scheduled for November. Round 2 final decisions are expected to be made in the December time frame. Per the American Recovery and Reinvestment Act, 75% of the Broadband Stimulus funds are expected to have been awarded by September 30th, 2010.

OUR INDUSTRY CONTACTS BELIEVE THE PROCESS WILL SHIFT OUT... Recently, we've been speaking with a number of contacts in the consulting engineering community. The consulting engineers, of course, have historically provided outsourced network engineering services to the independent telcos (IOCs), most of which don't have their own internal network engineering teams. In our view, the consultants are a great resource for checking up on the Broadband Stimulus plan as the IOCs are likely targets for receiving stimulus money.

Our consulting engineering contacts are generally skeptical about the timing of Round 1 funding decision-making and disbursement timetables. This shouldn't be a major surprise for investors as the program has already had several push-outs of investors' perceptions of timing. There are several hurdles here...

First, after the Round 1 finalists are named, there will be a 30-day period where comments can be submitted by interested industry parties. It is likely that, for some projects, different entities will dispute the validity of claims within particular project submissions (unserved versus under-served areas for example). The competitive environment between/among service providers will likely stoke this process.

Second, there will be a due diligence period under which the RUS and NTIA organizations can ask the applicants questions about specific proposals. The Rural Utilities Service, for example, has a field organization that will evaluate specific proposals more closely. We note that both organizations are massively under-staffed to handle the volume of applications. The RUS is attempting to hire people on 2-year contract basis. Our contacts indicate that the NTIA is currently looking for "volunteers" among the engineering consulting community to evaluate project proposals. A long due diligence period would obviously extend the timing for project awards.

Third, the proposals for RUS money will require further environmental impact studies (we're unsure if the NTIA proposals have the same requirement). We understand that very few of the current proposals include these analyses. We're unsure how much this could hold up final decisions for Round 1. It's possible that project funding could get awarded to some of these deals contingent upon completion of environmental impact studies.

Not surprisingly, our contacts are universally anticipating delays in the process. Final decisions for Round 1 could likely slip from November into December or even January/February. Moreover, the timing for actual spending Broadband Stimulus dollars could fall into the Spring of next year. Clearly, many regions within the U.S. won't be able to trench in new infrastructure given the winter months. Also, it may take time for various projects to complete environmental impact studies, obtain right-of-way, source equipment, and generally complete steps toward building infrastructure. In our view, it is possible that delays could push actual stimulus spending past the Q1'10 timeframe currently anticipated by investors. Nonetheless, the Stimulus program will clearly provide a boost for equipment vendors in general.

Important Disclosures

As is the case with all Jefferies employees, the analyst(s) responsible for the coverage of the financial instruments discussed in this report receive compensation based in part on the overall performance of the firm, including investment banking income. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgement.

For Important Disclosure information on companies recommended in this report, please visit our website at <https://jefferies.bluematrix.com/bluematrix/JefDisclosure> or call 212.284.2300.

Meanings of Jefferies & Company, Inc, Ratings

Buy - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 15% or more within a 12-month period.

Hold - Describes stocks that we expect to provide a total return (price appreciation plus yield) of plus 15% or minus 10% within a 12-month period.

Underperform - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

Our focus on mid-capitalization and growth companies implies that many of the companies we cover are typically more volatile than the overall stock market, which can be amplified for companies with an average stock price consistently below \$10. For companies in this category only, the expected total return (price appreciation plus yield) for Buy rated stocks is 20% or more within a 12-month period. For Hold rated stocks with an average stock price consistently below \$10, the expected total return (price appreciation plus yield) is plus or minus 20% within a 12-month period. For Underperform rated stocks with an average stock price consistently below \$10, the expected total return (price appreciation plus yield) is minus 20% within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Jefferies & Company, Inc. policies.

CS - Coverage Suspended. Jefferies & Company, Inc. has suspended coverage of this company.

NC - Not covered. Jefferies & Company, Inc. does not cover this company.

Restricted - Describes issuers where, in conjunction with Jefferies engagement in certain transactions, company policy or applicable securities regulations prohibit certain types of communications, including investment recommendations.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Valuation Methodology

Jefferies' methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Risk which may impede the achievement of our Price Target

This report was prepared for general circulation and does not provide investment recommendations specific to individual investors. As such, the financial instruments discussed in this report may not be suitable for all investors and investors must make their own investment decisions based upon their specific investment objectives and financial situation utilizing their own financial advisors as they deem necessary. Past performance of the financial instruments recommended in this report should not be taken as an indication or guarantee of future results. The price, value of, and income from, any of the financial instruments mentioned in this report can rise as well as fall and may be affected by changes in economic, financial and political factors. If a financial instrument is denominated in a currency other than the investor's home currency, a change in exchange rates may adversely affect the price of, value of, or income derived from the financial instrument described in this report. In addition, investors in securities such as ADRs, whose values are affected by the currency of the underlying security, effectively assume currency risk.

Distribution of Ratings

Rating	Count	Percent	IB Serv./Past 12 Mos.	
			Count	Percent

OTHER DISCLOSURES

This material has been prepared by Jefferies & Company, Inc. a U.S.-registered broker-dealer, employing appropriate expertise, and in the belief that it is fair and not misleading. The information upon which this material is based was obtained from sources believed to be reliable, but has not been independently verified, therefore, we do not guarantee its accuracy. Additional and supporting information is available upon request. This is not an offer or solicitation of an offer to buy or sell any security or investment. Any opinion or estimates constitute our best judgment as of this date, and are subject to change without notice. Jefferies & Company, Inc. and Jefferies International Limited and their affiliates and their respective directors, officers and employees may buy or sell securities mentioned herein as agent or principal for their own account. Upon request Jefferies & Company, Inc. may provide specialized research products or services to certain customers focusing on the prospects for individual covered stocks as compared to other covered stocks over varying time horizons or under differing market conditions. While the views expressed in these situations may not always be directionally consistent with the long-term views expressed in the analyst's published research, the analyst has a reasonable basis and any inconsistencies can be reasonably explained.

Additional information for UK and Canadian investors

This material has been issued by Jefferies & Company, Inc. and in the United Kingdom ("UK") is approved and distributed by Jefferies International Limited which is authorized and regulated by the Financial Services Authority ("FSA").

In the UK, this material is intended for use only by persons who have professional experience in matters relating to investments falling within Articles 19(5) and 49(2)(a) to (d) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended), or by persons to whom it can be otherwise lawfully distributed. For Canadian investors, this material is intended for use only by professional or institutional investors. None of the investments or investment services mentioned or described herein is available to other persons or to anyone in Canada who is not a "Designated Institution" as defined by the Securities Act (Ontario). For investors in the Republic of Singapore, this material is provided by Jefferies & Company, Inc. through Jefferies Singapore Limited ("JSL") pursuant to Regulation 32C of the Financial Advisers Regulations. The material contained in this document is intended solely for accredited, expert or institutional investors, as defined under the Securities and Futures Act (Cap. 289 of Singapore). If there are any matters arising from, or in connection with this material, please contact JSL in Singapore at 80 Raffles Place #15-20, UOB Plaza 2, Singapore 048624, telephone: +65 6551 3950.

The information set forth herein was obtained from sources believed to be reliable, but has not been independently verified by JIL, JSL or JEFCO. Therefore, except for any obligation under the rules of the FSA we do not guarantee its accuracy. Additional and supporting information is available upon request. This is not an offer or solicitation of an offer to buy or sell any security or derivative instrument, or to make any investment. Any opinion or estimate constitutes the preparer's best judgment as of the date of preparation, and is subject to change without notice. JIL, JSL, JEFCO, their associates or affiliates, and their respective officers, directors, and employees may have long or short positions in, or may buy or sell any of the securities, derivative instruments or other investments mentioned or described herein, either as agent or as principal for their own account.

This material does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this report is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of the investments referred to herein and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Jefferies & Company, Inc. research reports are disseminated and available primarily electronically, and, in some cases, in printed form. Electronic research is simultaneously available to all clients. This report or any portion hereof may not be reprinted, sold or redistributed without the written consent of Jefferies & Company, Inc.
